

Bawat BaaS – Ballast as a Service

Mobile Ballast Water Compliance

THE CHALLENGE

A vessel in Sweden had 9,000 m3 of non-compliant ballast water. Its onboard BWMS malfunctioned, leading the Swedish Transport Agency to withhold the vessel in port.

THE SOLUTION

Rapid response:

- Vessel contacted Bawat Friday afternoon
- Bawat BaaS mobile, land-based reception facility deployed Saturday morning
- Ballast water treated on site, restoring full compliance

THE OUTCOME

- Vessel returned to compliance with minimal delay
- Demonstrated Bawat BaaS reliability and flexibility
- Authorities taking decisive action to protect marine environments

MOBILE BWMS THAT ACTUALLY WORKS

- Mobilization within 24–48 hours across European ports, yards, and terminals
- Pay-per-use: flexible service model
- Minimal disruption: treats ballast water alongside the vessel or in dry dock
- Certified & compliant: IMO & USCG approved, one-pass solution
- Universal: operates in all water conditions — no filters, no UV, no chemicals — just proven heat-based technology

Contact Bawat immediately if a ballast water issue arises: info@bawat.com | +45 8870 8803

Ensure rapid mobilization and minimal downtime.
